

SAFEGUARD

PHONICS: Level 'A'

For 8 to 14 Year Olds

Compiled by Chris Nugent Edited by Philip O'Carroll

Almost *all* problems of *age level* performance in primary school *read-aloud* skills and *spelling* skills can be linked very directly to the student's lack of basic phonic skills.

Finely graded phonic *drills*, of the type in this program, will forever remain an *essential* part of the effective teaching of older age students to spell and read accurately. Accurate spelling and reading demand that children *perceive* as well as *recall* literally every letter in every word. Additionally, no student will ever be able to write any word exactly if he hasn't actually *read* the word exactly in the first place. So *quality* reading skill too, will forever involve the accurate perception of every letter.

All *quality* performance requires the necessary *discipline* to be exact in perception and recall (i.e. in their 'reading' and 'spelling') of English words. Near enough spelling skills will simply never be good enough on most job application forms.

AGE LEVEL AND DIAGNOSTIC TESTING

Competent correction of phonic skills and spelling problems with older children must be preceded by competent age level as well as diagnostic literacy testing sessions. If you are using the downloadable version of this program, you can access all the necessary tests by clicking on the website, www.literacytesting.com, which is listed at the foot of every worksheet.

PROGRESSIVE EVALUATION

Progressive evaluation is a feature that clearly follows the completion of every worksheet. Should the teacher desire, each worksheet can be completed in up to **three** main ways: The words on the worksheet can be merely completed on the page or they can be written in full in a separate book. Finally they can be ‘drilled’ in the old fashioned “spelling test” way. A mix of the three methods, as determined by the teacher, is advised for most ‘older age’ failing students who urgently need to catch up on the phonic skills that they should have learned in the earlier years of the primary school. Accurate results on the **spelling test** are the clearest sign of competence. See worksheets following.

WHEN STUDENTS **STILL FIND THE WORK TOO DIFFICULT**

An alternative program is recommended for those relatively rare older age students who might still find the work in this program too difficult even in the early stages.

THREE PHONIC DRILL LEVELS: THREE BOOKS

There are three distinctively different levels of phonic drills covered by the 167 downloadable PHONIC DRILL worksheets in this program. These levels are described as follows:

PHONIC DRILLS: LEVEL A The graded word lists in this level range from words like pat, spat, sprat and splat to words like squirrel, elastic and splendid. There are 51 worksheets containing 282 short lists involving some 1,300 different words. The words all contain the “short” vowel sounds that can be heard at the beginning of ant egg ink opt and up. This group of English phonic structures is usually mastered by children who are performing comfortably at an 8.5 year old level of word recognition skills.

PHONIC DRILLS: LEVEL B The words mainly contain English “long” vowel sounds that be heard at the beginning of acorn even icon oval union oops out and oil. Many different letter combinations and sounding out rules are involved. There are 54 worksheets containing 272 short lists involving some 1,500 different words. This group of structures is usually mastered by children who are performing comfortably at a 10.5 year old level of word recognition skills.

PHONIC DRILLS: LEVEL C The words in the later worksheets are mainly of the polysyllabic and phonically complex type whereas the words in the earlier worksheets contain mainly words where the sounds of the letters are modified by the letters ‘R’ , ‘W’ and ‘QU’. There are 62 worksheets containing 275 short lists involving some 1,650 different words. This group of structures is usually mastered by students who are performing comfortably at a 13.5 year old level of word recognition skills.
